DIRECTORY OF REFRIGERATED WAREHOUSES
IN THE UNITED STATES 1/

Since 1916, the United States Department of Agriculture has collected statistical data relating to the refrigerated warehousing industry. These data are published monthly in the Cold Storage Report which lists the quantities of various food commodities stored in refrigerated facilities at the close of each month and the amount of storage space used for storing these products. In addition, a survey of refrigerated warehouse capacity is made biennially to determine the amount of gross and net space, by temperature range, in public, private, and semiprivate facilities. It is only through the voluntary cooperation of the warehousemen whose facilities are listed in this directory that reasonably accurate storage information can be collected for the Cold Storage Reports and the surveys of refrigerated warehouse capacity.

This is the fifth directory of this kind released by the Department. The first was compiled and released in 1947, revised in 1951, 1953, and 1959. Names and addresses were compiled from those participating in the October 1, 1961 biennial survey of the capacity of refrigerated warehouses in the United States.

This revised directory has a fourfold purpose:

1. To provide a means of extending recognition to warehousemen who have year after year contributed their time and money toward making possible the monthly Cold Storage Reports and allied reports on the refrigerated warehousing industry.
2. To make readily available to processors and food handlers, information as to what storage facilities are available in localities where space is needed for their products.
3. To urge those using this directory to call to the attention of the Department of Agriculture any refrigerated storage facility, as defined below, which is not listed herein.
4. To furnish research and statistical users of the Cold Storage Report with a better idea as to what the present coverage is for the reports that are issued monthly.

Refrigerated Storage Facilities Listed

Refrigerated storage warehouses listed in this directory are facilities artificially cooled to 50° F. or lower wherein foodstuffs are generally

1/ Revised by Agricultural Estimates Division, Statistical Reporting Service.

stored for 30 days or more. This includes all types of storage businesses having refrigerated storage space--public, private, semiprivate, and meat-packing establishments. Food packers and processors are also included provided: (1) they have refrigerated storage space for holding their products, and (2) their products are generally held for as long as 30 days in this space.

Food handlers who conduct a business from space leased in public or semi-private facilities and have complete control over the in-and-out movement of their commodities are included in this directory if they are using their storage space as defined above.

Not included in the directory are facilities owned by wholesalers, jobbers, or retailers who use their storage space for holding products less than 30 days. Nor are facilities listed that belong to the Armed Services or are a part of a hotel or similar establishment where persons are housed and fed.

For purposes of the Department's market information program on storage holdings and warehouse capacity, operators of frozen food locker plants are not asked to participate; therefore, such establishments are not listed in this directory. For the same reason, branch distributing houses of meat-packers also are not included nor meatpacking facilities wherein refrigerated space is used solely for carcass chilling, cutting, boning, etc., and not for storage purposes.

How the Warehouse List was Determined

Warehouse facilities listed in the directory are those from which monthly reports are being received regularly in support of the Department's market information program on cold storage holdings, or those that participated in the October 1, 1961 biennial survey of refrigerated warehouse capacity.

How Directory is Arranged

To present the data in the most usable form, the States are arranged alphabetically, as are cities within States, and warehouses within cities.

The address of each warehouse in the directory is usually the plant location and not the mailing address of the firm, but in most cases, both addresses are the same.

Warehouse companies or associations having more than one facility are listed in each of the cities wherein the units are located, or at the branch plant address if it is different from the "parent" warehouse location. Although every effort has been made to list each unit or branch separately, it may be that some "parent" warehouse has not notified the Department of Agriculture of its units and so they are not listed.

Symbols and Definitions Used in this Directory

- PB - Public cold storage: An artificially cooled warehouse, the operator of which is engaged in storing food for others for pay.
- PR - Private cold storage: An artificially cooled warehouse, the operator of which conducts a warehousing business to facilitate his main function as a producer, processor, or distributor but does not store commodities for others for pay.
- SP - Semiprivate cold storage: An artificially cooled warehouse, the operator of which uses his space to care for his own commodities and, in addition, stores various food commodities for others for pay.
- MP - Meatpacking plant: An establishment engaged in processing meat and meat products for food and has refrigerated space for the storage of these products.
- PBA - Public apple house
- PBF - Public fish house
- PRA - Private apple house
- PRF - Private fish house
- SPA - Semiprivate apple house
- SPF - Semiprivate fish house
